MOHAMED FAWZY

Flutter Developer | +201068808559 | Tanta, EG | mofawzy.com7@gmail.com | github.com/M-Fawzy2004 | linkedin.com/in/mohamed-fawzy-02388729b | portfolio-beta-three-iveyvx1ntx.vercel.app

Summary

Junior Flutter Developer with experience building production-ready cross-platform mobile applications for iOS and Android using Flutter. Skilled in Clean Architecture, BLoC/Cubit state management, REST API integration, Firebase, and Supabase, with hands-on experience integrating AI features using Gemini. Passionate about building scalable, maintainable mobile applications and continuously learning modern Flutter technologies.

Skills

- **Domain Skills**: Mobile App Development, Clean Architecture, MVVM, SOLID Principles, Dependency Injection (GetIt), REST API Integration, Authentication Systems, Payment Integration, Google Maps API, Offline Mode, Push Notifications, Performance Optimization, Localization (AR/EN)
- **Technical Skills**: Dart, Flutter, JavaScript, React Native (Learning), BLoC, Cubit, Provider, GetX, Dio, Firebase, Supabase, Git, GitHub, Postman, Figma, Android Studio, VS Code
- **Soft Skills**: Problem Solving, Communication, Teamwork, Time Management, Attention to Detail

Work Experience

Junior Flutter Developer January 2026 - March 2026
Freelance Flutter Developer | Trade Box *Remote*

- Integrated RESTful authentication APIs using Dio across 10+ screens, implementing OTP verification, onboarding, registration, and session management with robust error handling and form validation.
- Optimized app performance using const constructors, selective keys, and BLoC stream scoping combined with API response caching, reducing unnecessary widget rebuilds and improving overall responsiveness.
- Improved application stability through robust error handling, reusable UI components, and maintainable code, enhancing overall user experience.

Education

Faculty of Computers and Information Tanta, EG
Bachelor of Information System (GPA: 3.0) *June 2022 - June 2026*
Graduation Project: KidDrive — a dual-interface Flutter application enabling secure child transportation through dedicated parent and driver dashboards, featuring role-based authentication and bilingual (Arabic/English) support. (Feb – Apr 2026)

Projects

Academia AI (Present)
Solo Project | Flutter, Supabase, Gemini
• Designed and developed a 25+ screen AI-powered educational platform using Flutter, Clean Architecture, BLoC, and Supabase with a 3-tier subscription system (Free / Standard / Pro).
• Integrated Gemini AI to generate study plans, quizzes, content explanations, and conversational tutoring with offline caching to minimize API calls.
• Implemented PDF upload and image-to-PDF conversion with document processing support.
• Implemented subscription and quota management, deep linking, dynamic theming, and Arabic/English localization.

ParkMate
Solo Project | Flutter, Supabase, Mapbox, Clean Architecture, BLoC/Cubit
• Developed a smart parking assistant application using Clean Architecture, GetIt, GoRouter, and Supabase Authentication (Email, OTP, Password Reset).
• Integrated Mapbox for reverse geocoding & turn-by-turn navigation with live route tracking, ETA, and deviation detection; implemented on-demand GPS location capture for saving and retrieving parking spots.
• Added bilingual support (Arabic/English with RTL), offline connectivity detection, parking history, and Cubit-based state management across the app.

E-Commerce Platform

Flutter, Firebase, Paymob, OpenStreetMap, GoRouter

- Developed a full e-commerce solution including a customer mobile application and an admin dashboard with modules for product management, orders, users, and analytics.
- Integrated OpenStreetMap, Paymob, image lazy loading, pagination, and API caching to improve performance and loading speed.
- Implemented authentication, checkout, order tracking, reusable widgets, shared components, and GoRouter navigation.

Certifications

Mobile Application Development – Summer Training, Information Technology Institute (ITI) 2025-08
