MOHAMED FAWZY

Flutter Developer | +201068808559 | Tanta, EG (Relocation) | mohamedfawzydev27@gmail.com | github.com/M-Fawzy2004 | linkedin.com/in/mohamed-fawzy-02388729b | portfolio-beta-three-iveyvx1ntx.vercel.app

Summary

Flutter Developer with experience building and publishing cross-platform mobile applications for Android and iOS. Proficient in Clean Architecture, BLoC/Cubit, REST API integration, Firebase, Supabase, and AI-powered features. Published an app on Google Play and delivered freelance and academic projects with secure authentication and scalable architecture.

Work Experience

Junior Flutter Developer January 2026 - March 2026

Freelance Flutter Developer | Trade Box *Remote*

- Integrated RESTful authentication APIs using Dio across 10+ screens, implementing OTP verification, user registration, onboarding, session management, form validation, and robust error handling.
- Optimized app performance using const constructors, selective keys, and BLoC stream scoping combined with API response caching, reducing unnecessary widget rebuilds and improving overall responsiveness.
- Improved application stability by implementing reusable UI components, robust error handling, and maintainable code, enhancing user experience.

Education

Faculty of Computers and Information Tanta, EG

Bachelor of Information System GPA: (3.3/4.0) *June 2022 - June 2026*

Graduation Project: KidDrive (Grade: Excellent) — Developed a dual-interface Flutter application for secure child transportation with dedicated parent and driver dashboards.

Skills

- **Domain Skills**: Mobile App Development, Clean Architecture, MVVM, SOLID Principles, Dependency Injection (GetIt), RESTful API Integration, Authentication, Payment Integration, Google Maps API, Offline Support, Push Notifications, Performance Optimization, App Deployment (Google Play), Localization (Arabic/English)
- **Technical Skills**: Flutter, Dart, BLoC, Cubit, Provider, Firebase, Supabase, Dio, HTTP, RevenueCat, Google Play Console, Android Studio, VS Code, Git, GitHub, Postman, Figma
- **Soft Skills**: Problem Solving, Communication, Teamwork

Projects

Academia AI (Google Play)

Solo Project | Flutter, Supabase, AI Integration, Google Play

• Designed and developed a 25+ screen AI-powered educational platform using Flutter, Clean Architecture, BLoC, and Supabase with a 3-tier subscription system (Free, Standard, Pro).

• Integrated AI features for study plans, quiz generation, content explanations, and conversational tutoring, while implementing response caching to reduce API calls.

• Published the app on Google Play and integrated Google Play Billing with RevenueCat for subscription and payment management.

• Implemented PDF upload, image-to-PDF conversion, deep linking, dynamic theming, and Arabic/English localization.

ParkMate

Solo Project | Flutter, Supabase, Mapbox, Clean Architecture, BLoC/Cubit

• Developed a smart parking assistant application using Flutter, Clean Architecture, BLoC/Cubit, GetIt, GoRouter, and Supabase Authentication.

• Integrated Mapbox APIs for navigation, reverse geocoding, live route tracking, ETA estimation, and parking location management.

• Implemented offline connectivity detection, parking history, Arabic/English localization (RTL), and scalable state management.

E-Commerce Platform
Flutter, Firebase, Paymob, OpenStreetMap, GoRouter

- Developed a full-featured e-commerce solution, including a customer mobile application and an admin dashboard for product, order, user, and analytics management.
- Integrated OpenStreetMap, Paymob payment gateway, image lazy loading, pagination, and API response caching to optimize performance and reduce loading times.
- Implemented authentication, shopping cart, checkout, order tracking, reusable UI components, and GoRouter-based navigation.

Certifications

Mobile Application Development – Summer Training, Information Technology Institute (ITI) 2025-08
