Summary

Junior Mobile Software Engineer specializing in Flutter & Dart, with 1+ years of experience publishing high-performance applications on Google Play. Skilled in implementing Clean Architecture, reactive state management (BLoC), and secure backend workflows using Supabase and Firebase. Experienced in integrating RESTful APIs, offline-first architectures, and performance optimization to deliver reliable mobile products.

Skills

- **Domain Skills**: Mobile App Development, Real-Time Architecture, Payment Systems, State Management, Responsive UI/UX, Performance Optimization
- **Technical Skills**: Dart, Flutter, BLoC/Cubit, Clean Architecture, SOLID Principles, MVVM, Dependency Injection (GetIt), REST APIs, Dio, Supabase, Firebase, Offline Support, Google Maps API, Push Notifications, Localization (RTL), Git/GitHub, VS Code, Play Console
- **Soft Skills**: Problem Solving, Cross-Functional Communication, Teamwork, Adaptability

Work Experience

DocMate (Freelance) August 2026 - Present
Junior Flutter Developer *Remote*

- Architected and published DocMate on (Google Play) using Flutter, Clean Architecture, and BLoC for patient-doctor workflows.and BLoC for seamless patient-doctor workflows.
- Engineered a real-time smart queue and appointment system using Supabase RPCs, dynamic scheduling, and push notifications.push notifications.
- Built a React admin dashboard to manage doctor verifications, payment approvals, and strict Supabase RLS policies.RLS access policies.
- Implemented offline caching, localization, and centralized error handling, ensuring robust data integrity across services.

Trade Box (Freelance) January 2026 - March 2026
Junior Flutter Developer *Remote*

- Engineered secure auth flows across 10+ screens using Dio and REST APIs, integrating OTP verification, session management, and error handling.
- Improved UI responsiveness and performance by scoping BLoC streams, implementing API caching, and eliminating redundant widget rebuilds.

Academia AI October 2025 - Present
Founder & Flutter Engineer *Remote*

- Architected and published Academia AI on (Google Play) across 25+ screens using Flutter, Clean Architecture, BLoC, and Supabase.
- Engineered a multi-LLM engine integrating DeepSeek, LLaMA, Groq, and Gemini, featuring automated failover and response caching.
- Built AI-driven features including audio lecture recording, OCR extraction, automated quiz generation, and a GPA calculator.
- Implemented monetization and subscription workflows using RevenueCat, Google Play Billing, and Supabase usage quota validation.

Education

Faculty of Computers and Information Tanta, EG
Bachelor of Information Systems - GPA: (3.3/4.0) *January 2022 - January 2026*

Projects

ParkMate

Engineered a smart parking assistant app using Flutter, Clean Architecture, BLoC/Cubit, and Supabase Auth. Integrated Mapbox APIs to deliver real-time route tracking, dynamic reverse geocoding, ETA estimation, and parking spot management. Implemented proactive offline detection, full Arabic/English localization (RTL support), and persistent parking history.

E-Commerce Platform

Built an end-to-end e-commerce ecosystem comprising a cross-platform Flutter customer app and an administrative manage ment dashboard. Integrated Paymob payment gateway and OpenStreetMap alongside API response caching, pagination, and lazy loading to maximize performance. Engineered complete commerce flows including cart management, order tracking, and GoRouter-based deep navigation.
