Summary

Junior Flutter Developer with hands-on experience building and shipping production-ready iOS and Android applications. Proficient in Clean Architecture, BLoC/Cubit state management, and integrating AI-powered features using Gemini. Focused on writing clean, testable code and delivering smooth 60fps performance on real devices. Currently expanding into React Native, eager to join a product team where strong engineering standards and continuous growth are valued.

Education

Tanta University Tanta, Egypt

Bachelor of Information System, Faculty of Computers and Information - GPA : 3.0 *September 2022 - May 2026*

Work Experience

Junior Flutter Developer January 2026 - March 2026

Freelance Flutter Developer | Trade Box *Remote*

- Integrated RESTful authentication APIs using Dio across 10+ screens, implementing OTP verification, onboarding, registration, and session management with robust error handling and form validation.
- Optimized app performance using const constructors, selective keys, and BLoC stream scoping combined with API response caching to maintain smooth 60fps rendering, validated on physical Android and iOS devices using Flutter DevTools.
- Developed unit and widget tests for core business logic and UI components, improving stability and minimizing regressions across authentication and onboarding workflows.

Projects

Academia AI (Dec 2025 – Present)

Solo Project | Flutter, Supabase, Gemini AI

• Architected a 25+ screen educational platform using Clean Architecture, BLoC, and Supabase with a 3-tier subscription system (Free / Standard / Pro) enforcing AI quotas and feature gates.

• Integrated 5 Gemini AI features including study plans, PDF summarization, quiz generation, content explanation, and conversational tutoring with offline caching to reduce repeated API calls.

• Profiled on real devices using Flutter DevTools, eliminating high-frequency rebuilds to reach stable 60fps; built document upload flow supporting PDF extraction and image-to-PDF conversion.

• Added unit and widget tests for subscription and quota logic; implemented Arabic/English localization, dynamic theming, and deep linking.

KidDrive (Graduation Project) (Feb 2026 – Apr 2026)

Flutter, Dart, REST APIs, BLoC/Cubit

• Built a dual-interface Flutter app for safe child transportation, delivering separate parent and driver dashboards with role-based authentication, OTP verification, and onboarding flows using Clean Architecture and Cubit.

• Developed core parent-side features including child management, subscription system, trip tracking, and driver details; integrated RESTful APIs using Retrofit with repository pattern and secure storage.

• Implemented 10+ screens across both interfaces including home, chat, profile, trips, and families management; added Arabic/English localization and skeletonizer loading for smooth UX.

E-Commerce Platform (Apr 2026 – Jun 2026)

Flutter, Dart, Firebase, Paymob, OpenStreet Maps, GoRouter

• Built a full e-commerce solution including a customer mobile app and a web admin dashboard with 10+ admin modules covering product management, order monitoring, user feedback, and reporting.

• Integrated OpenStreet Maps and Paymob payment gateway; applied image lazy-loading, pagination, and API caching to reduce memory usage and load times across mobile and web..

• Wrote widget and integration tests for critical flows including checkout, authentication, and order tracking; used GoRouter and shared component libraries across platforms.

Skills

- **Domain Skills**: Mobile App Development, Clean Architecture, MVVM, SOLID Principles, Dependency Injection, GoRouter, Deep Linking, Authentication Systems, Payment Integration, Google Maps API, Gemini AI Integration, PDF Processing, Image Analysis, Performance Optimization, API Caching, Image Caching, Memory Leak Detection, Offline Mode, Push Notifications, Responsive UI Design, Manual Testing
- **Technical Skills**: Dart, JavaScript, SQL, Flutter, React Native, HTML, CSS, Material Design, Cupertino, BLoC, Cubit, Provider, GetX, REST APIs, Dio, HTTP, Firebase, Supabase, Flutter DevTools, Unit Testing, Widget Testing, Integration Testing, Git, GitHub, Postman, Figma, Android Studio, Visual Studio Code
- **Soft Skills**: Problem Solving, Communication, Teamwork, Time Management, Adaptability, Fast Learning, Attention to Detail, Debugging, Analytical Thinking
